This vibration insensitive lens is designed to be used with large line scan and area sensors under harsh industrial conditions. The V38-Mount fits to our modular Unifoc system with a large variety of accessories. Optimized for a specific magnification to achieve best results at close-up applications. Low chromatic aberrations plus low geometric errors provide high image quality.

Key features

- Modular system
- Low distortion
- Low chromatic aberrations
- Large image circle

Applications

- Web inspection
- Surface inspection
- Measurement systems
- Package sorting / logistic

Annotation		
Focal length	Nominal focal length	
F/# range	Image space F-number range for infinity focus position	
Numerical aperture	Maximum real numerical aperture (depending on recommended magnification range either for infinity or respective fixed magnification)	
Max. sensor size	Image circle diameter	
Max. angle of view	Angle of view associated with maximum sensor size (depending on recommended magnification range either for infinity or respective fixed magnification)	
Rec. magnification range	Magnification range as recommended by Schneider-Kreuznach	
Rec. working distance range	Working distance, i.e. distance between object and first mechanical element, associated with recommended magnification range	
Max. mechanical focus travel	Maximum possible movement of the lens from infinity position (depending or recommended magnification range either for infinity or respective fixed magnification)	
Net weight	weight of unpacked lens without lens cap	
f'eff	Effective focal length	
SF	Distance between vertex of first lens surface and object space focal point	
S'F'	Distance between vertex of last lens surface and image space focal point (bac focal distance at infinity)	
HH'	Distance between principal planes	
ß'P	Pupil magnification (= exit pupil diameter / entrance pupil diameter)	
SEP	Distance between vertex of first lens surface and entrance pupil	
S'AP	Distance between vertex of last lens surface and exit pupil	
Σd	Distance between vertices of first and last lens surface	
s'A	Flange focal distance (in air) for infinite object distance (depending on recommended magnification range either for infinity or respective fixed magnification)	
ß'	Magnification (= image size / object size), negative value because image is inverted	
00'	Distance between object and image	

Unless otherwise stated all dimensions in this data sheet are in mm.
