## Relative Illuminance

The relative illuminance shows the image brightness over the image height  $u'$  in relation to the image center.

- f-number = 2.8
- - - f-number = 4
- - - f-number = 5.6

## Relative Distortion

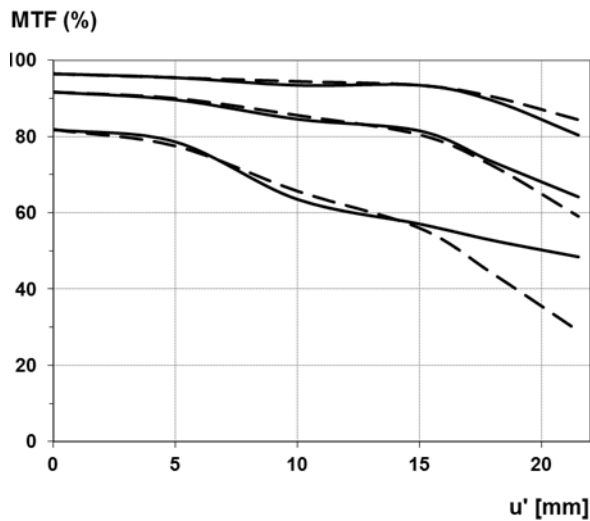

The relative distortion shows the deviation of the image height from the expected image height  $u'$  in percent.

## MTF Charts

The Modulation Transfer (MTF) as a function of image height ( $u$ ) and slit orientation (sagittal, tangential) has been measured with white light at spatial frequencies of  $R = 10, 20$  and  $40$  cycles/mm.
