Advanced High-Speed, High-Sensitivity TDI Camera

Based on Teledyne DALSA's industry leading CMOS TDI technology, the new Linea HS™ cameras are the most advanced TDI products in the marketplace. These cameras deliver the highest performance available, with unique features—including high dynamic range (HDR)—that significantly improve detectability for many demanding applications. The cameras come with the next-generation CLHS interface, delivering up to 8.4 Gigapixels per second over a single fiber optic cable (with error correction).
